SCHOOL REPORT.

FELLOW CITIZENS :

As required by law, I respectfully submit for your consideration the following report of the condition, progress, and needs of our town schools.

Whole number of Scholars in Town,	489
Amount of Money raised by Town,	\$2,000 00
“ received from State,	762 14
Total School Fund,	2,762 14

In summing up the work of the year, it is gratifying to report that in most cases success has attended the efforts of those employed to teach our schools, and in no case has failure occurred. Irregularity in attendance caused by sickness has interfered with the success of several schools, three having been closed abruptly on that account. In several districts a steady progress has been maintained throughout the year, and a high standard of excellence has been attained. Yet many are lacking and many obstacles must be met and overcome before we can reasonably expect to secure better results.

1st. How shall we hold the advance made and make further advance? In the annual reports of former years Supervisors have frequently made “such suggestions and recommendations as will best promote the interests of our schools” Yet our school buildings are gloomy and uncomfortable and shamefully deficient of all suitable appliances, especially needed in our ungraded schools to enable the teacher to attain larger and better results. Thus we continue a practice that is wasteful of much of the teacher’s time and force—hence wasteful of the school money. In our report for the year ending March, 1883, we find a remedy prescribed, viz: “abolish the District System.” With the districts abolished, the town becomes responsible for the building and repair of school-houses, also for the furnishing of the school with all needed apparatus. Thus burdens of

the citizens, as well as privileges of the children, are equalized, and and the best teachers employed and retained, such as not only instruct their pupils in those branches which are useful in common business life, but also seek to fulfill the requirement of the State statute to "use their best endeavors to impress on the minds of the children and youth committed to their care and instruction, the principals of morality and justice, and a sacred regard for truth, love of country, humanity, and a universal benevolence, sobriety, industry, and frugality, chastity, moderation and temperance, and all other virtues which are the ornaments of human society." Best in instruction and government, best in example and character.

2d. Shall we establish Free High Schools? One strong argument in favor of a division of our town is that many citizens claim that the social and business conditions of today demand a broader and higher intelligence than our common schools are able to impart, such knowledge as is alike essential to meet successfully the larger demands of life in every station, and for the varied and higher interests of citizenship. Why may not the whole town profit by a more efficient agency and establish a Free High School for each division to benefit those who "outgrow" our common schools.

HENRY J. MERRILL, SUPERVISOR.
