Collector of Taxes. JOHN F. WILLIAMS.

Road Commissioners. SEWELL P. WINSLOW, WILLIAM E. WINSLOW JOHN H. LUNT.

Auditor.

D. W. LUNT.

Constable. JOHN F. WILLIAMS.

## Warrant for Town Meeting.

#### To JOHN F. WILLIAMS, a Constable in the Town of Falmouth,

GREETING:

In the name of the State of Maine, you are hereby required to notify and warn the inhabitants of the said Town of Falmouth, qualified to vote in town affairs, to meet at the town house in said town, on the second day of March, 1908, at nine o'clock in the forenoon, to act upon the following articles, to wit:

First. To choose a Moderator to preside at said meeting.

Second. To choose a Clerk for the ensuing year.

Third. To hear and act upon the reports of the Selectmen, Overseers of the Poor, Assessors, Treasurer and Superintendent of Schools.

Fourth. To choose all other necessary Town Officers for the ensuing year.

Fifth. To see if the town will grant and raise such sums of money as may be necessary for the maintenance and support of schools and the poor and the repairs of roads and bridges and defray all other necessary town charges for the ensuing year.

Sixth. To see what action the town will take in regard to the pay of town officers.

Seventh. To see if the town will vote to raise a sum of money and how much for the destruction of the brown tail moth, and act anything relative to its expenditure. Eighth. To see if the town will vote to authorize the Town Treasurer, on a written order from the Selectmen, to hire on the credit of the town, such sums of money, as in their opinion, may be necessary to meet the liabilities and current expenses of the town, or act anything relative thereto.

Ninth. To see if the town will vote yes, or no, upon the adoption of the provisions of chapter 112 of the Public Laws of Maine, for the year 1907, relating to the appropriation of money necessary to entitle the town to State aid for highways for the year 1908.

Tenth. To see if the town will raise, appropriate and set apart for permanent improvement of the main highways within the town, such sums of money as is contemplated and directed by Section 5 of Chapter 112 of the Public Laws of Maine for the year 1907, being the sum of \$163.00.

Eleventh. By request of S. P Winslow, to see if the town will vote to lower the grade of Abbott's hill, so called, on the Old Gray road, and raise money for the same.

Twelfth. To see if the town will vote to rebuild the culvert near Mrs. Adamson's, on road leading to Skillin's Corner, and raise money for the same.

Thirteenth. To see if the town will vote to establish an easier grade at the hill just easterly of W. H. Pearson's house, and raise money for the same.

Fourteenth. To see if the town will vote to rebuild the culvert just below the residence of W. H. Harmon, and raise money for the same.

Fifteenth. To see if the town will vote to buy a new road machine, and raise money for the same.

Sixteenth. To see if the town will vote to accept the road as laid out by the Selectmen upon petition of trustees of the estate of John Marshall Brown.

Seventeenth. To see if the town will vote to discontinue that part of Waite's Landing road between the termini of the proposed road. Eighteenth. To see if the town will vote to accept the list of jurors as revised and prepared by the Selectmen, Treasurer and Town Clerk.

The Selectmen give notice that they will be in session for the purpose of correcting the list of voters in said town, and hearing and deciding upon the application of persons claiming to have their names entered upon said lists, at the town office, at eight o'clock in the forenoon on the day of said meeting.

Given under our hands this seventeenth day February, A. D. 1908.

> FRANK B. BLANCHARD, ALGERNON BOWIE, LAWRENCE L. RAMSDELL, Selectmen of Falmouth.

The following articles were handed in for insertion in the warrant after the copy had been given to the printer.

Nineteenth. To see if the town will vote to adopt the recommendations of the Superintendent of schools with regard to changing schools No. 1 and 2 on the Foreside into a Grammar and a Primary School by conveying the pupils by the electrics.

Twentieth. To see if the town will vote to add a recitation room to the school house at West Falmouth (No. 7) with a view of conveying the pupils from No. 8 and No. 12 to this school; and raise the sum of five hundred dollars to meet the expense of the same.

Twenty-first. To see if the town will vote to grade the school house lot at Falmouth corner, No. 3, and raise money for the same.

## REPORT OF

## Selectmen, Assessors and Overseers of Poor.

To the Inhabitants of Falmouth:

ARTHUR S. NOYES, TREAS.

FALMOUTH, MAINE, FEB., 15, 1908. I hereby certify that I have examined the above account of Arthur S. Noyes, Treasurer for the year 1907, and find it properly vouched, and find in his hands fifty-three hundred fifty-five dollars and forty-eight cents (\$5,355.48).

D. W. LUNT, AUDITOR.

## SCHOOL REPORT.

#### To the School Committee and Citizens of Falmouth, Maine:

In accordance with custom the following report on the condition and progress of the work of your schools for the past year is respectfully submitted.

Number of persons residing in the Town between the ages of five and twenty-one years on April 1st 1906, 466

Number of persons residing in town between the ages of five and twenty-one years on April 1st 1907, 448 Decrease in number of persons of school age, 18 Number of schools maintained during the year, 11 Length of school year in weeks, 32Number of different teachers employed, 15 Average number of teachers employed, 12 Whole number of pupils in attendance, 243Average number. 192

Schools and the work which I have observed has evinced skill and care on the part of teachers as well as preparation and interest on the part of pupils. In most of the schools good progress has been apparent throughout the year; and whenever conditions have appeared to militate against this result, I have endeavored to correct them by such changes and suggestions as seemed best adapted to the end desired.

I found no course of study in the schools and although the teachers have worked along the same lines in general, they have been at some disadvantage in not having their work

The data here given and all other statements in this report relating to the first term of the year are taken from the records left by the former Superintendent of Schools.

more definitely laid out and arranged for them. It will be my care, as soon as possible, to provide this necessary addition to your school system, and data have already been collected to that end.

#### TEACHERS.

When it is considered what an important element in a community the work of the teacher is, and what a great difference exists in the results derived from the services of an expert painstaking educator, and those of an unskillful inexperienced or careless teacher, this subject becomes one that should possess the deepest interest to every one having at heart the welfare of the schools and community.

The town of Falmouth has much cause for congratulation in its teaching corps as a whole; for while, as in everything human there is room for improvement in this direction, I am of the opinion that it will compare favorably with the teaching force of any similar community in the state.

I would not have it understood, however, that conditions in this direction are entirely satisfactory; for while, in several instances, excellent teachers are being employed at the wages now paid, it must be evident to any one conversant with the present conditions of educational matters, that the present scale of wages paid by the town, is not high enough to ensure the best teachers for the work in all cases. In several instances, local conditions, such as the home of the teacher in the neighborhood of the school, have been a means of overcoming this difficulty; but such conditions should not generally be relied upon.

The expense of this branch of your school service has been a little larger than last year and there seems to be slight hopes of its decreasing under the present arrangement of your schools.

Few changes have been made in the teaching force during the past year. For the fall term the committee followed the recommendations of my predecessor in the employment of teachers and the results have on the whole, justified that course of action. There were three vacancies caused by resignation, at that time; and these positions were filled by the only new teachers employed since the spring term. In but one other case has there been any change, and by this a former teacher of the town returned to fill a vacancy caused by resignation at No. 6.

#### SCHOOL BUILDINGS.

It may appear to some that the condition of the school houses of the town should be so well known as to render any statements from the Superintendent of Schools under this head superfluous. But unless Falmouth is unique among towns of its kind, it is doubtful if very little knowledge of such matters is possessed by the average citizen, beyond the school house in his own district. As might, perhaps, be surmised not many of the school houses of the town are well adapted to the use they now subserve; for both the changed condition of the schools and modern ideas of light, heat, ventilation, and comfort, call for requirements which only a few of them possess.

In several cases the desks are of ancient design and intended for older pupils than now occupy them. In one instance, at least, they have proven so uncomfortable for the younger pupils that the teacher has resorted to the expedient of placing blocks of wood and boxes beneath the seats for the little ones to rest their feet upon. In no less than four or five of the eleven school houses now in use do these conditions exist, and while it may be argued by some that they are as comfortable for the present generation as they were for those who have used them in the past, I believe that the majority of the citizens of this town will be in favor of taking steps to improve them as soon as possible.

The exterior of the school buildings are generally in very good condition and well preserved. Two have been painted during the past year and repairs of some extent have been made on the doorway at No. 9, where considerable trouble was experienced from the water beating in during storms, and new out-houses have been built at No. 3.

Although the school house at Pleasant Hill has been re-

cently repaired, the hall way still presents a dilapidated appearance on account of the broken plastering and should be covered with sheathing before the opening of the spring term of school.

At No. 6 the underpinning is in a bad condition and will necessitate some expenditure the coming year. The blackboards and ceiling of this school house also need attention and a plank walk should be laid from the road to the door as much annoyance is caused from the mud and water which collects there in wet weather. There are few outhouses in town that would not be greatly benefited by a small outlay upon them.

As the preservation itself of so much school property has necessitated the expenditure of a large part of the appropriation for repairs it would appear that little attention has been given to the improvement of the school grounds for some time and their condition is consequently far from satisfactory. While, perhaps, it would be impolitic to attempt any extensive improvements in the direction at the present time, a beginning should be made, for which there is no better opportunity than at No. 3 where a really fine school yard is in a deplorable condition through lack of care.

In closing these remarks upon the condition and needs of the school houses, I do not wish it to be understood that I am finding fault with those who have in the past had charge of the school property of the town; for, after examining the town reports of several previous years, I am convinced that all has been done in the direction of repairs and improvements that could be expected from the small appropriations for these purposes.

#### TEXT BOOKS.

As less than half the amount appropriated for text books remained unexpended when I assumed the duties of superintendent on July 1st, only such books have been purchased during the past six months as appeared absolutely necessary. But even under those conditions this account has been a little over-drawn, for many of the books were found to be in such a bad condition that further use of them was quite impossible.

There have been no introductions except in the case of the "New Education Readers" two numbers of which were added to those already in the schools. These books are now used as the basic readers for the first four grades.

In the higher grades there will be need of new books on this subject, while the geographies and arithmetics throughout the schools are in a very dilapidated condition and will require renewal in the near future.

In the purchase of text books I have endeavored to act, with a view of producing uniformity in them throughout the town, the lack of which is one of the great inconveniences to be encountered throughout the entire district.

In nearly all the schools I found a variety of books in use under the head of supplementary readers. These seemed to be without any definite standard of grading, and in several cases, entirely, unfit for the class of pupils using them.

I shall attempt to remedy this evil by the introduction of a set of standard readers as a basis and by the use of other reading matter to supplement, but not to displace them.

It is my opinion that nothing is lost from a financial standpoint in keeping the text books in good condition; for when a worn and defaced book is placed in the hands of the pupil, he loses all care for its preservation and soon transfers the rough and careless usage accorded to this book to all others. If pupils are to be taught carefulness in the handling and use of their books, these books must be worth caring for and preserving.

#### IN GENERAL.

That the schools of your town possessed many excellent qualities I had been led to believe before coming into actual contact with them, both from report and from an association as teacher with an occasional pupil from them. My official relations with them has confirmed me in this opinion, for there are many things connected with them that are entirely praiseworthy.

The attitude of the pupils to their schools and teachers, the respect shown to me as an official, and the general spirit of cheerfulness with which they have accepted my suggestions and seconded my efforts to bring about changes and improvements—all betoken a condition of things that does not exist through accident or chance.

But if it was my belief that the present condition of your schools was entirely satisfactory, I would refrain from making such a statement if it should have a tendency to cause any cessation in the efforts necessary not only to improve and perfect them but also to keep them to any high standard obtained. With this idea in mind I have, without reserve, called your attention to some of the things which seem to me to need remedying, and how, perhaps, this can best be done has been explained in that part of this report entitled "A Plan to Improve the Falmouth Schools."

The length of my report and the lack of some data for the first term of the year has prevented the insertion of the names of pupils not absent and a few other details which would naturally follow.

#### A PLAN TO IMPROVE THE FALMOUTH SCHOOLS.

That nothing is done well enough which can be done beter is a common axiom of school instruction, and one which, in principle, is as applicable to the arrangement and management of schools as to the work done in them. No school or system of schools should be regarded as satisactory so long as there is opportunity of improvement; especially when such improvement may be brought about without extra expense to those upon whom the support of the schools in question falls.

After an observation and study of the conditions connected with Falmouth school system extending over a period of six months, the present Superintendent feels convinced that an opportunity exists for greatly improving the schools of the town with but little or no extra expense to the taxpayers. In order to understand why such an opportunity should exist at the present time, some explanation of the changes which have taken place during the last few years in the conditions of schools in rural communities will be necessary.

First, the recent change in the State laws making it incumbent upon towns that do not support free high schools, to pay the tuition of all pupils prepared to enter upon a high school course in any approved high school or academy in the State, has practically eliminated such pupils from the town schools. The result of this and other causes which tend to diminish the school attendance in rural communities has been to reduce several of our schools to such small size that their continuance seems both impracticable and unprofitable; for schools of less than a dozen pupils can be maintained at but slightly less expense than those containing two or three times that number, while the results obtained from such schools are usually much the less satisfactory, as teachers who are able to maintain the enthusiasm and impart the class of instruction necessary for the success of very small schools can rarely be procured at the wages generally paid under such conditions. As a result the teachers employed in such cases are frequently either of limited experience in the schoolroom or none at all, and conditions which really require a high degree of skill to meet successfully are left to those least qualified for the work; for it is now generally conceded by educators, that an inexperienced and resourceless teacher is likely to make a more dismal failure in a small mixed school than in a much larger one of few grades.

The second circumstance which renders the present time exceedingly opportune for improving the Falmouth schools by such changes as are here contemplated results from the change in the mill tax made by the last session of the State Legislature.

In accordance with the provisions of this law as it now stands, if towns this year raise the same amount by local taxation for the support of schools as last year, a substantial increase in the sum available for this purpose for the coming year will result, so that conditions will be exceedingly favorable for the smaller towns to make changes which aim at needed improvement in their schools.

The changes which are contemplated by the present plan

for improving the schools of this Town are as follows:

First. The schools on the Foreside Nos. 1 and 2, each of which now includes nearly all the grades to the high school, should be changed into a primary and a grammar school, containing four grades each instead of eight. This change can easily be brought about by transferring a part of the pupils of each school to the other by the electrics, and at an expense which would be quite inconsiderable as compared with the great advantages that would accrue to each school from such a change. For this arrangement would greatly increase the efficiency of both schools by enabling the teachers to confine their efforts to fewer classes and subjects, and thus providing the time so necessary for the drill-work that modern school methods require to ensure even a fair measure of success.

Secondly. The school at No. 4 should be closed and pupils from that section of the Town should attend school at No. 5, (Pleasant Hill). Here the distance is so short that conveyance would be unnecessary except in the case of pupils of the first two or three grades. The accommodations at No. 5 are ample for the additional seven or eight pupils which this change would necessitate providing for, and arrangement can be made at very slight expense for a recitation room there should an assistant teacher be needed.

Thirdly. A recitation room should be added to the school building at West Falmouth and the pupils from Nos. 8 and 12 should be conveyed to that school. At present there are eight pupils at No. 8 and seven at No. 12; and the prospects of any marked increase in the number at either school seem at present quite remote.

Of the several changes suggested in these outlines the last one is the most logical and, perhaps, the most likely to appeal to the average citizen; for it is quite evident to all that schools of seven or eight pupils can be run only at disadvantage, both as regards expense and benfits to the scholars attending them. The distance of either of the schools from No. 7 is not so great that there need be any difficulty or discomfort to pupils in their conveyance, while the advantages gained from attending a larger and better graded school would far outweigh any inconvenience that could possibly result and prove an ample recompense for the regrets that any might entertain at the closing of the schools in their home districts. For with the present teacher as principal and a good assistant to relieve him of the care of the lower grades, this school may be made a model institution of its kind, from which pupils can be graduated thoroughly prepared either for higher branches of study or for the ordinary vocations of life.

In connection with this arrangement, the closing of two school houses in good repair and well adapted to the ordinary needs of schools, may seem to some to be a questionable proceeding; but when it is considered that they are being used only at a constant financial loss to the Town not to mention the disadvantages to pupils who attend schools maintained under such adverse conditions, arguments in favor of keeping them open lose their force; for it is quite evident that the cost of maintaining two seperate schools will more than meet the expense of conveying the pupils and providing an assistant teacher at West Falmouth.

In closing these recommendations the Superintendent wishes it to be understood that he is not attempting to urge the acceptance of his plans upon the citizens of Falmouth, for while he feels assured that the arrangements herein outlined would prove of great advantage to the school system of the Town, he is entirely willing to leave the decision of the matter to those who have the greatest interests at stake-the parents of children who attend the schools. But whether any part of these recommendations may seem worthy of acceptance by the voters of the Town the fact will still remain that if the schools of this or any other community are to keep pace with the march of progress, there must be no stint of effort or expense, within reasonable limits, on the part of those who have at heart the best interests of the rising generation

H. M. MOORE, Supt. of Schools. Falmouth, Maine, Feb. 17, 1908.
